

Stream

The spa that pushes the limits of comfort.

The Stream is a new generation spa, affordable, accessible, and above all else very comfortable.

The *Stream* was born from the idea of having a simple and hassle-free spa for the consumer. Its unique and modern style makes it a must-have. In addition to its incomparable look, we have tested its comfort with dozens of people of different sizes, thus adapting the spa to multiple body physiognomies. The *Stream* has unique and comfortable seats, each with an avant-garde style and approach to massage. The hybrid lounge station has multiple functions combining comfort for a single person or a couple, thus creating a different and unique experience.

The spa is equipped with a Whirlpool jet for increased water control, which also provides a more powerful massage targeting different massage zones in the spa. Ease at your fingertips. The *Stream* is 120V quick connect and easily convertible to 240V*.

Finally, its modern and chic appearance with corners backlighting makes the *Stream* a benchmark of style and functionality.

A test will convince you.

* For connection to 240V, a certified electrician is required.
